Art. 313 Trolley with sheet metal shelves

Article 313 is a trolley with 3 shelves in sheet metal and load-bearing structure in angle steel. The shelves have a retaining edge to secure the products transported. The side handle and top-quality wheels make the trolley easy to handle even when fully loaded. Useful for quick and easy indoor handling of various materials in a variety of industrial and commercial sectors. Various changes and variations are available on request.

- Painted.
- Distance between shelves: 35.5 cm.
- Rubber wheels with thread guards, 2 fixed and 2 revolving.
