Art. SPC118

Double-front trolley shelving

Sturdy, customisable structure made of painted tubular steel and steel profiles.

- Suitable for transporting boxes and bulk material.
- Fixed shelves at the base and removable central ones. Made of white laminboard wood.
- Can be fitted with a cover sheet for materials to be stored for long periods or needing protection during transport.
- Ø 100 rubber wheels mounted on zinc plated steel swivel support.
- Distance between containment tubes can be customised to suit different types of material to be handled.
- Modifications and variations can be made on request.
