

Wire mesh trolleys and containers

Art. 245
Three-sided trolley

Article 245 is a three-sided trolley/container made of zinc-plated wire mesh with a load-bearing structure in tubular steel. The white laminboard base is built into the structure. The accurate construction technique and top-quality wheels make it easy to handle, strong and long-lasting, ensuring it remains easy to move, thanks to the addition of two push handles, even when fully loaded. It is very versatile and can be used to store materials in various product sectors. -Painted.

- White, built-in, laminboard base.
- Revolving rubber wheels with thread guards.
