

Stackable trolleys and containers

Art. 275

Stackable container

Article 275 is a stackable container made with zinc-plated wire mesh and a load-bearing structure in tubular steel. The special structure of the interwoven mesh and accurate construction technique make it light, easy to handle, strong and long-lasting. Art. 275 offers quick and easy storage of moderately heavy materials in a small amount of space as it is stackable. The bottom container can be equipped with wheels so that it can be handled and moved.

- Painted.
- Overlapping distance 10.5 cm.
- Stack of 1+5 total load capacity of 180 Kg.
- Revolving rubber wheels with thread guards.
